

The CBC Onshore News

February 2010

I tell you what it sure seems like winter lasts twice as long as the summer. The little taste of the warmer days we had sure made me long for summer. This cold is just too bitter for me. But we are on the countdown, less than 80 days.

Many of you may have read on the website the Don Claunch resigned his board position for personal reasons. I would like to thank him for his hard work and dedication to the club. He will thankfully remain our webmaster and continue to maintain and update the website. He has done many wonderful things for the club including the website and the awesome weather station which we can all enjoy. Beyond those he has helped us continue to be an outstanding place for families and friends. Thank you Don.

We have finalized the 2010 budget and have a contract in place with Cheryl for 2010. We have identified a few projects that need finishing including updates to the beach house area, updating some lighting around the club, and working on some of the steps around the club. One major project we are beginning is updating the Gasboy system. We are functioning on a 20 year system and it is time for an update. We will be looking into what will serve the club best for the next many years.

As a reminder, your annual dues and fees are now due. Bills for these were sent out in December. Remember, to keep current and make sure your membership and slip space are in good standing. You have to be paid by March 1st, 2010. Please notify Karen of any changes to your account. For any questions or phone numbers please check out the website at www.casperboatclub.com.

Also the tentative 2010 schedule is posted on the website, we do have a few changes and additions in the works and will be added just as soon as they are finalized. The first event of the year is the annual Commodore's party set for Saturday April 10th. Again this year the Casper Petroleum Club will host the event. Soon after the club will open in April, then before we know it we will be back in full swing of fun in the sun.

Nick Hopkins, Commodore
