

Dock Box Policy
Casper Boat Club rev 2018

All dock boxes must have prior approval of the Board before installation may begin. Members seeking to install dock boxes must present their request in writing to the Board, and include detail that states/illustrates the size and type of box, and where it is to be located. In general, dock boxes should keep walkways and views open, and be unobtrusive.

The concrete surface of the promenade must remain clear for pedestrian traffic according to ADA regulations. Therefore, dock boxes may not be placed on the concrete area of the promenade and must be placed on the dirt area on the south side of the promenade walkway. Walkway areas and steps must remain clear for pedestrian traffic along the swim beach docks (east and west of beach house).
